10 Attorneys for Plaintiff

11
12 IN THE UNITED STATES DISTRICT COURT
13 FOR THE NORTHERN DISTRICT OF CALIFORNIA

14 (SAN FRANCISCO DIVISION)

15 IN RE: BEXTRA AND CELEBREX
16 MARKETING SALES PRACTICES AND
17 PRODUCT LIABILITY LITIGATION

MDL No. 1699

C 07 3956

18 BUCKRIDGE, JAMES (FL);
19 KING, JERRY (AZ);
20 SHIRLEY, TERRY (CA);
21 KOFFMAN, DAVID (FL);

22 Plaintiff,

23 v.

24 PFIZER, INC., PHARMACIA
25 CORPORATION, G.D. SEARLE LLC, (FKA
26 G.D. SEARLE & CO.), and MONSANTO
27 COMPANY,

28 Defendants.

Case No. _____

CIVIL COMPLAINT

JURY TRIAL DEMANDED

29 Plaintiffs James Buckridge, Jerry King, Terry Shirley, and David Koffman by and through
30 their counsel, bring this action against Defendants PFIZER, INC., PHARMACIA CORP.,
31 MONSANTO COMPANY, and G.D. SEARLE LLC. (hereinafter collectively "Defendants") and
32 allege as follows:

33 **I. PARTIES**

34 1. This is an action for damages arising from Defendants' design, manufacture, sale,

COMPLAINT

1 testing, marketing, advertising, promotion, and/or distribution of the unsafe medication
2 Celecoxib, trade name CELEBREX® (“CELEBREX”).

3 2. Plaintiff James Buckridge was at all relevant times adult resident citizen of the
4 State of FL, County of Orange. Plaintiff was prescribed and began taking CELEBREX for the
5 treatment of pain. As a direct and proximate result of using CELEBREX, Plaintiff suffered severe
6 cardiovascular injuries while taking CELEBREX, including, but not limited to, serious
7 cardiovascular injury or heart attack on or about September 5, 2001, which has caused and will
8 continue to cause Plaintiff damages and places Plaintiff at risk of further serious injury or death.

9 3. Plaintiff Jerry King was at all relevant times adult resident citizen of the State of
10 Arizona, County of Maricopa. Plaintiff was prescribed and began taking CELEBREX for the
11 treatment of pain. As a direct and proximate result of using CELEBREX, Plaintiff suffered severe
12 cardiovascular injuries while taking CELEBREX, including, but not limited to, serious
13 cardiovascular injury or heart attack on or about September 5, 2005, which has caused and will
14 continue to cause Plaintiff damages and places Plaintiff at risk of further serious injury or death.

15 4. Plaintiff Terry Shirley was at all relevant times adult resident citizen of the State
16 of California, County of Orange. Plaintiff was prescribed and began taking CELEBREX for the
17 treatment of pain. As a direct and proximate result of using CELEBREX, Plaintiff suffered severe
18 cardiovascular injuries while taking CELEBREX, including, but not limited to, serious
19 cardiovascular injury or heart attack on or about September 5, 2005, which has caused and will
20 continue to cause Plaintiff damages and places Plaintiff at risk of further serious injury or death.

21 5. Plaintiff David Koffman was at all relevant times adult resident citizen of the State
22 of FL, County of Hillsborough. Plaintiff was prescribed and began taking CELEBREX for the
23 treatment of pain. As a direct and proximate result of using CELEBREX, Plaintiff suffered severe
24 cardiovascular injuries while taking CELEBREX, including, but not limited to, serious
25 cerebrovascular injury or stroke on or about October 1, 2001, which has caused and will continue
26 to cause Plaintiff damages and places Plaintiff at risk of further serious injury or death.

27 6. Defendant Pfizer Inc. (“Pfizer”) is a Delaware corporation with its principal place
28 of business in New York, New York. In 2003, Pfizer acquired Pharmacia Corporation for nearly
\$60 billion. At all relevant times Pfizer and/or its predecessors in interest were engaged in the

1 business of designing, testing, manufacturing, packaging, marketing, distributing, promoting, and
2 selling the drug Celecoxib, under the trade name CELEBREX in California and nationwide.

3 7. Defendant G. D. Searle, LLC, formerly known as G. D. Searle & Co. ("Searle") is
4 a Delaware corporation with its principal place of business in Illinois. At all relevant times,
5 Searle has been engaged in the business of marketing and selling CELEBREX nationwide and in
6 California. Searle is a subsidiary of Pfizer, acting as its agent and alter ego in all matters alleged
7 within this Complaint.

8 8. Defendant Monsanto Company ("Monsanto") was the parent corporation of Searle
9 and is a Delaware corporation. At all times relevant hereto, Monsanto, through its subsidiary
10 companies, was in the business of manufacturing, marketing, selling and distributing the
11 pharmaceutical product CELEBREX nationwide.

12 9. Defendant Pharmacia Corporation ("Pharmacia") is a Delaware corporation with
13 its principal place of business in New Jersey. At all relevant times, Pharmacia, and its
14 predecessors in interest have been engaged in the business of designing, testing, manufacturing,
15 packaging, marketing, distributing, promoting, and selling CELEBREX nationwide and in
16 California.

18 II. JURISDICTION AND VENUE

19 10. This is an action for damages, which exceeds seventy-five thousand dollars
20 (\$75,000.00).

21 11. There is complete diversity of citizenship between the Plaintiffs and Defendants.
22 This Court has subject matter jurisdiction over this matter pursuant to 28 U.S.C.A. § 1332
23 (diversity jurisdiction) because the amount in controversy exceeds \$75,000.00, and because there
24 is complete diversity of citizenship between Plaintiffs and Defendants.

25 12. Venue is proper in this United States Judicial District pursuant to 28 U.S.C.A.
26 § 1391. Defendants marketed, advertised and distributed the dangerous product in the district,
27 thereby receiving substantial financial benefit and profits the dangerous product in this district,
28 and reside in this district under 28 U.S.C.A. § 1391(c), such that venue is proper.

13. At all relevant times herein, Defendants were in the business of designing, manufacturing, marketing, developing, testing, labeling, promoting, distributing, warranting and selling their product, CELEBREX. Defendants at all times relevant hereto designed, developed, manufactured, promoted, marketed, distributed, tested, warranted and sold in interstate commerce the aforementioned prescription drug. Defendants do substantial business Nationwide and within this Federal Judicial District, advertise in this district, receive substantial compensation and profits from sales of CELEBREX in this District, and made material omissions and misrepresentations and breaches of warranties in this District so as to subject them to *in personam* jurisdiction in this District. In engaging in the conduct alleged herein each defendant acted as the agent for each of the other defendants, or those defendant's predecessors in interest.

III. INTERDISTRICT ASSIGNMENT

14. Assignment to the San Francisco Division is proper as this action is related to *In Re: Celebrex and Celebrex Marketing Sales Prac. and Pro. Liab. Lit.*, MDL-1699, assigned to the Honorable Charles R. Breyer by the Judicial Panel on Multidistrict Litigation on September 6, 2005. (See also, MDL-1699 Pretrial Order No. 2)

IV. FACTUAL BACKGROUND

A. Facts Regarding All Plaintiffs

15. Plaintiffs and Plaintiffs' healthcare providers were at the time of Plaintiffs' injuries unaware - and could not have reasonably known or have learned through reasonable diligence - that such injury directly resulted from Defendants' negligent and otherwise culpable acts, omissions, and misrepresentations or from Plaintiffs' ingestion of CELEBREX.

16. Plaintiffs used CELEBREX in a proper and reasonably foreseeable manner and used it in a condition that was substantially the same as the condition in which it was manufactured and sold.

17. Plaintiffs would not have used CELEBREX had Defendants properly disclosed the risks associated with the drug.

1 **B. Facts Regarding CELEBREX: Science and other Cox-2 Inhibitors**

2 18. CELEBREX is one of a class of pain medications called non-steroidal anti-
3 inflammatory drugs (“NSAIDs”). Aspirin, naproxen (trade name Aleve), and ibuprofen (trade
4 name Advil) are examples of well-known NSAIDs.

5 19. NSAIDs reduce pain by blocking the body’s production of pain transmission
6 enzymes called cyclo-oxygenase or “COX.” There are two forms of COX enzymes—COX-1 and
7 COX-2. Aspirin, naproxen and ibuprofen all act by blocking COX-1 and COX-2 enzymes.

8 20. In addition to decreasing In addition to decreasing inflammation, the
9 prostaglandins that are supported by COX-1 enzymes are involved in the production of gastric
10 mucus; this protects the stomach wall from the hydrochloric acid present in the stomach. It is
11 generally accepted in the medical community that by blocking the COX-1 enzyme, the body’s
12 ability to protect gastric tissue is hampered and as a result, can cause harmful gastrointestinal side
13 effects, including stomach ulceration and bleeding.

14 21. Prosagalin I2 is the predominant cyclooxygenase product in endothelium,
15 inhibiting platelet aggregation (preventing clot formation), causing vasodilation, and preventing
16 the proliferation of vascular smooth muscle. Whereas older NSAIDs inhibit Thromboxane A2
17 and Prostaglandin I2, the COX-2 inhibitors leave Thromboxane A2 unaffected. Thromboxane A2
18 is a potent platelet aggregator and vasoconstrictor which is synthesized by platelets. Therefore,
19 while the older NSAIDs suppress platelet aggregation and vasoconstriction, the COX-2 inhibitors
20 support it.

21 22. Traditional NSAIDs like aspirin reduce pain/inflammation and therefore pain by
22 inhibiting both COX-1 and COX-2 enzymes simultaneously. As would be expected, traditional
23 NSAIDs may cause ulcers in the stomach. However, traditional NSAIDs do not cause blood
24 clots, rather they actually reduce the risk of clots and help protect heart function.

23. Defendants and other pharmaceutical companies set out to remedy these ulcer and bleeding problems suffered by some NSAID users by developing “selective” inhibitors that would block only COX-2 production, thus (supposedly) allowing the proper maintenance of gastric tissue while still reducing inflammation.

24. In making this decision, Defendants and their predecessors in interest either intentionally ignored or recklessly disregarded current medical knowledge that selective COX-2 inhibition lowers prostacyclin levels and causes thromboxane A₂ to be uninhibited, causing blood clots, and giving rise to various clot-related cardiovascular events, including heart attack, stroke, unstable angina. The vasoconstriction and fluid retention cause the hypertension.

25. Pfizer launched CELEBREX, the first of the three major COX-2 inhibitor drugs, in January 1999 and initiated a massive marketing campaign to convince doctors and consumers of the superiority of their new “blockbuster” drug over less inexpensive NSAIDs. In May, 1999, Merck & Co., Inc. (“Merck”) launched Vioxx, its own selective COX-2 inhibitor.

26. Seeking increased market share in this extremely lucrative market, Defendants, and their predecessors in interest, also sought approval of a “second generation” selective COX-2 inhibitor and filed for FDA approval of Celecoxib (Celebrex) on January 16, 2001 for the (i) prevention and treatment of acute pain, (ii) treatment of primary dysmenorrhea, and (iii) relief of the signs and symptoms of osteoarthritis and adult rheumatoid arthritis.

C. Facts Regarding CELEBREX’s Safety and Defendants’ Knowledge Thereof

1 27. The potential for cardiovascular risk of selective COX-2 inhibitors was known to
2 Defendants long before the market launch. By 1997, and prior to the submission of the New
3 Drug Application (the "NDA") for CELEBREX, Defendants was aware that, by inhibiting COX-
4 2, CELEBREX altered the homeostatic balance between prostacyclin synthesis and thromboxane
5 and thereby, increased the prothrombotic effects of the drugs, causing blood clots to form in those
6 who ingested it. *See* Topol, E.J., *et al.*, *Risk of Cardiovascular Events Associated with Selective*
7 *Cox-2 Inhibitors*, *JAMA*, August 22, 2001 at 954.

9
10 28. As Pharmacologist, Dr. Garrett Fitzgerald, of the University of Pennsylvania,
11 reported in an editorial published in *The New England Journal of Medicine* on October 21, 2004,
12 that it was known as early as 1999 that selective COX-2 inhibitors, such as CELEBREX,
13 suppressed the formation of prostaglandin I-2 in healthy volunteers, inhibited platelet aggregation
14 in vitro, and may predispose patients to myocardial infarction or thrombotic stroke.

15
16 29. Based on the studies performed on CELEBREX, other COX-2 inhibitors, and
17 basic research on this type of selective inhibitor which had been widely conducted, Defendants
18 knew when CELEBREX was being developed and tested that selective COX-2 inhibitors posed
19 serious cardiovascular risks for anyone who took them, and presented a specific additional threat
20 to anyone with existing heart disease or cardiovascular risk factors. Studies show that selective
21 COX-2 inhibitors, including CELEBREX, decrease blood levels of a prostacyclin. When those
22 levels fall, the arteries are more vulnerable to clotting, high blood pressure, heart attack, and
23 stroke.
24

30. Despite years of studies on selective COX-2 inhibitors, as well as the disturbing new studies specifically analyzing the risks of CELEBREX, Defendants failed to take any action to protect the health and welfare of patients, but instead, continued to promote the drug for sale even after the FDA's Drug Safety and Risk Management Advisory Committee and Arthritis Drug Advisory Committee meetings.

1. CELEBREX and Cox-2 Studies Did Not Show CELEBREX to be Safe

31. The defendants touted the CELEBREX Long-Term Arthritis Safety Study ("CLASS") as the primary evidence to support its theory that CELEBREX was safer for consumers that could not tolerate traditional NSAIDs in their gastrointestinal system. (CLASS data is found in NDA 20-998/S-009 submitted to the FDA by G.D. Searle on June 12, 2000. CLASS was submitted to the FDA on June 12, 2000 and reviewed by James Witter, M.D., Ph.D. (FDA Medical Officer) on September 20, 2000.)

2. CLASS

32. The FDA Medical Officer Review of the CLASS data proves CELEBREX is no more efficacious than other traditional NSAIDs and is harmful to consumers. See generally, FDA Medical Officer Review, NDA 20-998/S-009 submitted to the FDA by G.D. Searle on June 12, 2000 ("FDA CLASS Review"). On April 7, 2005, the FDA issued an *Alert* noting only minimal information is available regarding CELEBREX: "The only available data from a long term comparison of CELEBREX to other NSAIDs came from the CLASS study...."

1 33. Pfizer misrepresented the data in CLASS by using biased authors. According to
2 the *Washington Post* the CLASS authors were either employees of Pharmacia, CELEBREX's
3 manufacturer, or paid consultants of the company. Pfizer needed a study to demonstrate that its
4 Cox-2 inhibitor was safer for the stomach than older cheaper medications: CLASS was designed
5 to be that study. Unfortunately, the results of the completed study revealed the truth –
6 CELEBREX offered no gastrointestinal (GI) benefit. Instead of releasing the complete –12-
7 month – results from CLASS, Pfizer had only the first six months of data published in the *Journal*
8 *of American Medicine*. JAMA 2000,48:1455-1460.

10 34. “After reviewing the full study, the FDA’s arthritis advisory committee concluded
11 that CELEBREX offers no proven safety advantage over the two older drugs in reducing the risk
12 of ulcer complications, said FDA spokesman Susan Cruzan.” *Washington Post*, August 5, 2001.
13 According to the FDA’s review of the CLASS data: “Celecoxib did not demonstrate any
14 statistical superiority to NSAIDs (pooled) or either comparator (diclofenac and ibuprofen) with
15 regards to the primary safety endpoint of CSUGIE (Clinically Significant Upper Gastrointestinal
16 Adverse Events) at any point in the trial although there were trends that favored celecoxib” (FDA
17 CLASS Review)

18 35. According to an August 5, 2001 article in the *Washington Post*, editors of the
19 *Journal of the American Medical Association* (JAMA) and other medical experts, “were
20 flabbergasted” when they realized they had been duped by only being provided with the first six
21 months of CLASS data. The *Washington Post* reported JAMA editors as saying: “When all of the
22 data were considered, most of CELEBREX’s apparent safety advantage disappeared.”

23 36. The “scientific double-cross” boosted sales. “[T]he JAMA article and editorial
24 have likely contributed to CELEBREX’s huge sales. ‘When the JAMA article comes out and
25 confirms the hype, that probably has more impact than our labeling does,’ said Robert J. Temple,
26 director of medical policy at the FDA’s Center for Drug Evaluation and Research.” *Washington*
27 *Post*, August 5, 2001.

28 37. “A total of 36 deaths occurred during the [CLASS] study or during post study

1 follow-up: 19 in the celecoxib group, 9 in the diclofenac group and 8 in the ibuprofen group
2 Most deaths were cardiovascular in nature.” FDA CLASS Review, at 54. The increased number
3 of adverse cardiovascular events in the CELEBREX group was not surprising as they were also
4 revealed in the original New Drug Application (NDA) submitted for CELEBREX. “In the
5 original NDA, myocardial infarction was noted to occur at a higher rate in celecoxib-treated as
6 compared to placebo treated patients. In the long term trial (Trial 024) that was included in the
7 NDA submission, the predominate (>90%) cause of death for patients taking celecoxib at any
8 does was cardiovascular.” FDA CLASS Review at 78.

9 38. Public Citizen, a public watchdog organization, reviewed the CLASS data in its
10 entirety. A complete review reveals the combined anginal adverse events were 1.4% in celecoxib
11 (CELEBREX) group versus 1.0% in either NSAID group. Specifically, the rate of heart attack in
12 the CELEBREX was double that of the other two NSAIDs, 0.2% vs. 0.1%, respectively.

13 39. The CLASS data proves that Pfizer knew that its first generation Cox-2 inhibitor,
14 CELEBREX, caused a disproportionately and statistically significantly high number of adverse
15 cardiovascular events before it was introduced to the market in January 1999. According to
16 Public Citizen, after CLASS, the FDA recommended a trial to specifically assess the CV risk of
17 COX-2 inhibitors. The Adenoma Prevention with Celecoxib (APC) trial was intended to be this
18 placebo-controlled trial of CELEBREX.

19 3. APC Trial

20 40. The Adenoma Prevention with Celecoxib (APC) trial compared the efficacy and
21 safety of celecoxib with placebo. N.ENG. J. MED. 352;11 at 1072. According to the APC trial, the
22 number of deaths from cardiovascular causes was significantly higher in the CELEBREX group
23 when compared to placebo. (0.1% placebo; 0.4% CELEBREX 200mg; and 0.9% CELEBREX
24 400mg). *Id.* at 1075.

25 41. The FDA Reported the APC data as follows¹:

26
27 In the National Cancer Institute’s Adenoma Prevention with
28 Celecoxib (APC) trial in patients at risk for recurrent colon polyps,

¹ April 7, 2005 FDA Alert: www.fda.gov/cder/drug/infopage/CELEBREX/CELEBREX-hcp.htm.

a 2-3 fold increased risk of serious adverse CV events was seen for CELEBREX compared to placebo after a mean duration of treatment of 33 months. There appeared to be a dose response relationship, with a hazard ratio of 2.5 for CELEBREX 200 mg twice daily and 3.4 CELEBREX 400 mg twice daily for the composite endpoint of death from CV causes, myocardial infarction (MI), or stroke.

42. The dosage noted in the study is important for two reasons: first, there appears to be an association between dosage and the increase in adverse cardiovascular events. See generally, at 1077. Second, most patients increase dosage. Pfizer knew patients were increasing their dosages as noted in CLASS: “Interestingly ... up to 70% of patients increased their dose for celecoxib.” FDA CLASS Review at 74. Thus, Pfizer was aware of the dosage creep.

4. Other CELEBREX Trials

43. Several other CELEBREX trials also gave Defendants insight into the cardiovascular risks presented by CELEBREX. The Prevention of Spontaneous Adenomatous Polyps (PreSAP) trial identified the death rate from cardiovascular causes (heart attack, stroke, heart failure, angina, or need for CV procedure) as 3.6% with CELEBREX as compared to 2.7% for placebo.

44. Public Citizen also reviewed the results of Study IQ IQ5-97-02-001 which reflected “the combined rate of all serious cardiovascular adverse events in patients getting a placebo was 2.1% but was greatly increased in those getting celecoxib to 7.7%, a 3.6 fold increase in CV risk in those people taking celecoxib. (p=0.03)”². According to Dr. Sidney Wolfe, “The study revealed a significantly increased rate (3.6-fold) of serious CV adverse events and more than a doubling in the rate of CV deaths in people using celecoxib compared to those using placebo.”³

5. Cox-2 Studies: VIGOR and APPROVe

45. Pfizer also had access to other data which indicated a cardiovascular risk with its drugs. Specifically, Pfizer had knowledge of two studies conducted by Merck related to its Cox-2 inhibitor Vioxx – Vioxx Gastrointestinal Outcomes Research (VIGOR) and Adenomatous Polyp

² *Public Citizen*, January 26, 2005, Dr. Sidney M. Wolfe.

³ *Id.*

1 Prevention (APPROVe).

2 **a. VIGOR**

3 46. In 2000, The FDA Medical Officer Review of CLASS specifically noted the
4 VIGOR trial and the concern over serious adverse cardiovascular events. FDA CLASS Review at
5 78.

6 47. According to VIGOR (near acronym for Vioxx Gastrointestinal Outcomes
7 Research) Vioxx patients experienced 20% more serious clinical adverse events (statistically
8 significant); they experienced 4.6 times more hypertension events serious enough to warrant
9 discontinuation, 1.7 times more edema events, and 1.85 times as many congestive heart failure
10 adverse events. By two measures of cardiovascular events related to blood clots, Vioxx had twice
11 the risk of naproxen and the results were considered statistically significant.

12 48. The VIGOR study comprised the most definitive scientific evidence ever obtained
13 about pharmaceutical products. It was a large, randomized clinical trial, the gold standard of
14 medical research. It was a safety study with endpoints set in advance. As Merck stated many
15 times, it was designed to provide definite proof of safety, convincing enough to silence the most
16 skeptical critics. In medical terms, the VIGOR results raised the question of whether selective
17 inhibition of Cox-2 was a monumental mistake from the start. While the NSAID risks to the GI
18 system were real and sometimes fatal, they were dwarfed by the cardiovascular risks of the
19 arthritis population that needed these drugs on a daily basis. All makers of NSAIDs, including
20 Defendants, were aware of these results.

21 **b. APPROVe**

22 49. Anxious to put safety questions surrounding Vioxx to rest, Merck designed
23 another large scale trial, Adenomatous Polyp Prevention (APPROVe), which was intended to test
24 the drug's ability to prevent or shrink colon polyps, but would also compare the cardiovascular
25 safety of Vioxx to a placebo control. According to the analysis conducted by Public Citizen of
26 the APPROVe data: Vioxx "doubled the risk of any thrombotic cardiovascular event" and
27 "doubled the risk of MI (myocardial infarction a/k/a heart attack)". *Public Citizen*, January 24,

28

⁴ Although Merck claims that the two-fold risk of heart attacks and strokes seen in the APPROVe trial did

1 2005, at 15. Despite the available CELEBREX data and other information related to Vioxx,
2 Pfizer never paused to re-evaluating the CELEBREX data and studies.

3 50. The scientific data available during and after CELEBREX's approval process
4 made clear to Defendants that their formulation of CELEBREX would cause a higher risk of
5 blood clots, stroke and/or myocardial infarctions among CELEBREX consumers, alerting them to
6 the need to do additional and adequate safety studies.

7 51. As stated by Dr. Topol on October 21, 2004, in *The New England Journal of*
8 *Medicine*, outlining Defendants' failure to have conducted the necessary trials before marketing
9 to humans "... it is mandatory to conduct a trial specifically assessing cardiovascular risk and
10 benefit of (COX-2 inhibitors). Such a trial needed to be conducted in patients with established
11 coronary artery disease, who frequently have coexisting osteoarthritis requiring medication and
12 have the highest risk of further cardiovascular events."

13 52. Dr. Topol was also the author on the study published in August 2001 in JAMA
14 (listed above) that reported an increased risk of thrombotic cardiovascular events in persons who
15 used COX-2 inhibitors.

16 53. Based upon readily available scientific data, Defendants knew, or should have
17 known, that their pre-approval testing of CELEBREX did not adequately represent the cross-
18 section of individuals who were intended consumers and therefore, likely to take CELEBREX.
19 Therefore, Defendants' testing and studies were grossly inadequate.

20 54. Had Defendants done adequate testing prior to approval and "market launch,"
21 rather than the extremely short duration studies done on the small size patient base that was
22 actually done the defendants' scientific data would have revealed significant increases in
23 incidence of strokes and myocardial infarctions among the intended and targeted population of
24 CELEBREX consumers. Adequate testing would have shown that CELEBREX possessed
25 serious side effects. Defendants should have taken appropriate measures to ensure that their
26

27 not emerge until after patients had been taking the drug for 18 months, closer analysis indicates that significant
28 increase in risk of heart attack was evident in as little as 4 months time.

1 defectively designed product would not be placed in the stream of commerce and/or should have
2 provided full and proper warnings accurately and fully reflecting the scope and severity of
3 symptoms of those side effects should have been made.

4 55. In fact, post-market approval data did reveal increased risks of clotting, stroke and
5 myocardial infarction, but Defendants intentionally suppressed this information in order for them
6 to gain significant profits from continued CELEBREX sales.

7 56. Defendants' failure to conduct adequate testing and/or additional testing prior to
8 "market launch" was based upon their desire to generate maximum financial gains for themselves
9 and to gain a significant market share in the lucrative multi-billion dollar COX-2 inhibitor market.

10 57. At the time Defendants manufactured, advertising, and distributed CELEBREX to
11 consumers, Defendants intentionally or recklessly ignored and/or withheld information regarding
12 the increased risks of hypertension, stroke and/or myocardial infarctions because Defendants
13 knew that if such increased risks were disclosed, consumers would not purchase CELEBREX, but
14 instead would purchase other cheaper and safer NSAIDs.

15 **D. Facts Regarding Defendants' Marketing and Sale of CELEBREX**

16 58. Such an ineffective and unreasonably dangerous drug could only be widely
17 prescribed as a result of a tremendous marketing campaign. In addition to being aggressive, the
18 Defendants' marketing campaign was fraudulent and misleading. But for fraudulent and
19 misleading advertising, consumers, including the Plaintiff, would not have purchased
20 CELEBREX, a more costly prescriptive drug, ineffective for its intended purposes.

21 59. On January 10, 2005 the FDA issued Pfizer a written reprimand for its
22 promotional activities. The reprimand reads: "These five promotional pieces [3 CELEBREX and
23 2 Celebrex] variously: omit material facts ... and make misleading safety, unsubstantiated
24 superiority, and unsubstantiated effectiveness claims." This was not the Defendants first offense
25 related to its Cox-2 inhibitors. The FDA also reprimanded Pfizer on October 6, 1999 noting:
26 "DDMAC has reviewed these promotional pieces and has determined that they are false or
27 misleading because they contain unsubstantiated comparative claims, misrepresentations of
28 CELEBREX's safety profile, and are lacking in fair balance." Ultimately, on April 8, 2005, the

1 New York Times reported the results of an FDA advisory panel: "The February advisory panel
2 voted overwhelmingly that the company should never again advertise the drug [CELEBREX]."

3 60. At all times relevant herein, Defendants engaged in a marketing campaign with the
4 intent that consumers would perceive CELEBREX as a safer and better drug than its other
5 NSAIDs and, therefore, purchase CELEBREX.

6 61. Defendants widely and successfully marketed CELEBREX throughout the United
7 States by, among other things, conducting promotional campaigns that misrepresented the
8 efficacy of CELEBREX in order to induce a widespread use and consumption. CELEBREX was
9 represented to aid the pain and discomfort of arthritis, osteoarthritis, and related problems.
10 Defendants made misrepresentations by means of media advertisements, and statements
11 contained in sales literature provided to Plaintiff's prescribing physicians.

12 62. Despite knowledge of the dangers presented by CELEBREX, Defendants and
13 Defendants' predecessors in interest, through their officers, directors and managing agents for the
14 purpose of increasing sales and enhancing its profits, knowingly and deliberately failed to remedy
15 the known defects of Defendants' product, CELEBREX, and failed to warn the public, including
16 Plaintiff, of the serious risk of injury occasioned by the defects inherent in Defendants' product,
17 CELEBREX. Defendants and their officers, agents and managers intentionally proceeded with
18 the inadequate safety testing, and then the manufacturing, sale and marketing of Defendants'
19 product, CELEBREX, knowing that persons would be exposed to serious potential danger, in
20 order to advance their own pecuniary interests. Defendants' conduct was wanton and willful, and
21 displayed a conscious disregard for the safety of the public and particularly of Plaintiff.

22 63. In an elaborate and sophisticated manner, Defendants aggressively marketed
23 CELEBREX directly to consumers and medical professionals (including physicians and leading
24 medical scholars) in order to leverage pressure on third party payors, medical care organizations,
25 and large institutional buyers (e.g., hospitals) to include CELEBREX on their formularies. Faced
26 with the increased demand for the drug by consumers and health care professionals that resulted
27 from Defendants' successful advertising and marketing blitz, third party payors were compelled
28 to add CELEBREX to their formularies. Defendants' marketing campaign specifically targeted

1 third party payors, physicians, and consumers, and was designed to convince them of both the
2 therapeutic and economic value of CELEBREX.

3 64. Defendants represented that CELEBREX was similar to ibuprofen and naproxen
4 but was superior because it lacked any of the common gastrointestinal adverse side effects
5 associated with these and other non-steroidal anti-inflammatory drugs (“NSAIDS”). For instance,
6 NSAIDS can, in certain patients, cause gastrointestinal perforations, ulcers and bleeding with
7 long-term use. Defendants promoted CELEBREX as a safe and effective alternative that would
8 not have the same deleterious and painful impact on the gut, but that would be just as effective, if
9 not more so, for pain relief.

10 65. CELEBREX possessed dangerous and concealed or undisclosed side effects,
11 including the increased risk of serious cardiovascular events, such as heart attacks, unstable
12 angina, cardiac clotting, deep vein thrombosis, hypertension, and cerebrovascular events, such as
13 strokes. In addition, CELEBREX was no more effective than traditional and less expensive
14 NSAIDs and, just like traditional NSAIDs, carried a risk of perforations, ulcers, and
15 gastrointestinal bleeding. Defendants chose not to warn about these risks and dangers.

16 66. Defendants knew of these risks before the U.S. Food and Drug Administration (the
17 “FDA”) approved CELEBREX for sale, but Defendants ignored, downplayed, suppressed,
18 omitted, and concealed these serious safety risks and denied inefficacy in its promotion,
19 advertising, marketing, and sale of CELEBREX. Defendants’ omission, suppression, and
20 concealment of this important information enabled CELEBREX to be sold to, and purchased, or
21 paid for by, the Consumers at a grossly inflated price.

22 67. Consequently, CELEBREX captured a large market share of anti-inflammatory
23 drugs prescribed for and used by patients. In 2004 alone, sales of CELEBREX exceeded \$2
24 billion, despite the significantly higher cost of CELEBREX as compared to other pain relievers in
25 the same family of drugs.

26 68. Because Defendants engaged in a promotional and marketing campaign that
27 featured an advertising blitz directly targeted to consumers, that touted CELEBREX as a safer
28

1 drug than other drugs in its class, while uniformly failing to disclose the health risks of
2 CELEBREX, Defendants were able to justify pricing CELEBREX significantly higher than the
3 cost of generic aspirin. In reality, that price inflation was not justified. Had Defendants disclosed
4 the truth about CELEBREX, Defendants would not and could not have reaped the billions of
5 dollars in CELEBREX sales that were achieved as a direct result of the concealment, omission,
6 suppression, and obfuscation of the truth.

7 69. The Defendants intentionally, deliberately, knowingly, and actively concealed,
8 omitted, suppressed, and obfuscated important and material information regarding the risks,
9 dangers, defects, and disadvantages of CELEBREX from Plaintiff, the public, the medical
10 community, and the regulators. This concealment and omission was deliberate, knowing, active,
11 and uniform, was intended to induce and maximize sales and purchases of CELEBREX, and
12 prevented Plaintiff from obtaining all the material information that would be important to their
13 decisions as reasonable persons to purchase, pay for, and/or use CELEBREX.

14 70. Defendants' systematic, active, knowing, deliberate, and uniform concealment,
15 omissions, suppression, and conduct caused Plaintiff to purchase, pay for, and/or use
16 CELEBREX; and caused Plaintiff's losses and damages as asserted herein.

17 71. Had Defendants done adequate testing prior to approval and "market launch," the
18 defendants' scientific data would have revealed significant increases in stroke and myocardial
19 infarction amongst the intended population of CELEBREX consumers. Adequate testing would
20 have shown that CELEBREX possessed serious side effects. Defendants should have taken
21 appropriate measures to ensure that their defectively designed product would not be placed in the
22 stream of commerce and/or should have provided full and proper warnings accurately and fully
23 reflecting the scope and severity of symptoms of those side effects should have been made.

24 72. In fact, post-market approval data did reveal increased risks of clotting, stroke and
25 myocardial infarction, but Defendants intentionally suppressed this information in order for them
26 to gain significant profits from continued CELEBREX sales.
27
28

73. Defendants' failure to conduct adequate testing and/or additional testing prior to "market launch" was based upon their desire to generate maximum financial gains for themselves and to gain a significant market share in the lucrative multi-billion dollar COX-2 inhibitor market.

74. At the time Defendants manufactured, advertising, and distributed CELEBREX to consumers, Defendants intentionally or recklessly ignored and/or withheld information regarding the increased risks of hypertension, stroke and/or myocardial infarctions because Defendants knew that if such increased risks were disclosed, consumers would not purchase CELEBREX, but instead would purchase other cheaper and safer NSAID drugs.

CLAIMS FOR RELIEF

FIRST CLAIM FOR RELIEF

Negligence

75. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully set forth herein and further allege as follows.

76. Defendants owed Plaintiffs a duty to exercise reasonable care when designing, manufacturing, marketing, advertising, distributing, and selling CELEBREX. This duty included the duty not to introduce a pharmaceutical drug, such as CELEBREX, into the stream of commerce that caused users to suffer from unreasonable, dangerous or untoward adverse side effects.

77. At all relevant times to this action, Defendants owed a duty to properly warn Plaintiffs and the Public of the risks, dangers and adverse side effects of their pharmaceutical drug CELEBREX.

78. Defendants breached their duties by failing to exercise ordinary care in the preparation, design, research, testing, development, manufacturing, inspection, labeling, marketing, promotion, advertising and selling of CELEBREX, including: failing to use due care in the preparation and development of CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

- a. failing to use due care in the design of CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;
- b. failing to conduct adequate pre-clinical testing and research to determine the safety of CELEBREX;
- c. failing to conduct adequate post-marketing surveillance and exposure studies to determine the safety of CELEBREX;
- d. failing to completely, accurately and in a timely fashion, disclose the results of the pre-marketing testing and post-marketing surveillance and testing to Plaintiffs, consumers, the medical community, and the FDA;
- e. failing to accompany CELEBREX with proper warnings regarding all possible adverse side effects associated with the use of CELEBREX;
- f. failing to use due care in the manufacture, inspection, and labeling of CELEBREX to prevent the aforementioned risk of injuries to individuals who used CELEBREX;
- g. failing to use due care in the promotion of CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;
- h. failing to use due care in the sale and marketing of CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;
- i. failing to use due care in the selling of CELEBREX to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

j. failing to provide adequate and accurate training and information to the sales representatives who sold CELEBREX;

k. failing to provide adequate and accurate training and information to healthcare providers for the appropriate use of CELEBREX; and

l. being otherwise reckless, careless and/or negligent.

79. Despite the fact that Defendants knew or should have known that CELEBREX caused unreasonable and dangerous side effects which many users would be unable to remedy by any means, Defendants continued to promote and market CELEBREX to consumers, including Plaintiffs, when safer and more effective methods of pain relief were available.

80. Defendants were, or should have been, had they exercised reasonable care, in possession of evidence demonstrating that CELEBREX caused serious side effects. Nevertheless, they continued to market their products by providing false and misleading information with regard to the safety and efficacy of CELEBREX.

81. Defendants knew or should have known that consumers such as Plaintiffs would foreseeably suffer injury as a result of their failure to exercise ordinary care as described above.

1 82. As a direct and proximate consequence of Defendants' acts, omissions, and
2 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses.
3 Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred
4 and will continue to incur medical and related expenses. Plaintiffs also have suffered and will
5 continue to suffer mental anguish, physical pain and suffering, diminished capacity for the
6 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
7 preexisting conditions and activation of latent conditions, and other losses and damages.
8 Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician
9 care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.
10

11
12 83. Defendants' conduct was committed with knowing, conscious, wanton, willful,
13 and deliberate disregard for the value of human life and the rights and safety of consumers,
14 including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to
15 punish Defendants and deter them from similar conduct in the future.
16

17 84. WHEREFORE, Plaintiffs demand judgment against Defendants and seek
18 compensatory damages, and exemplary and punitive damages together with interest, the costs of
19 suit and attorneys' fees and such other and further relief as this Court deems just and proper.
20

21 **SECOND CLAIM FOR RELIEF**

22 **Strict Liability**

23 85. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if
24 fully set forth herein and further allege as follows.

25 86. At all times relevant to this action, Defendants were suppliers of CELEBREX,
26 placing the drug into the stream of commerce. CELEBREX was expected to and did reach
27 Plaintiffs without substantial change in the condition in which it was manufactured and sold.

28 87. CELEBREX was unsafe for normal or reasonably anticipated use.

 88. CELEBREX was defective in design or formulation because when it left the hands

1 of the manufacturer and/or supplier, it was unreasonably dangerous and more dangerous than an
2 ordinary consumer would expect. CELEBREX was also defective and unreasonably dangerous in
3 that the foreseeable risk of injuries from CELEBREX exceeded the benefits associated with the
4 design and/or formulation of the product.

5 89. Celebrex is unreasonably dangerous: a) in construction or composition; b) in
6 design; c) because an adequate warning about the product was not provided; d) because it does
7 not conform to an express warranty of the manufacturer about the product.

8 90. The characteristics of Celebrex that render it unreasonably dangerous under
9 existed at the time the product left the control of the manufacturer or resulted from a
10 reasonably anticipated alteration or modification of the product.

11 91. The CELEBREX manufactured and supplied by Defendants was also defective
12 due to inadequate warnings, and/or inadequate clinical trials, testing and study, and inadequate
13 reporting regarding the results of the clinical trials, testing and study. Defendants failed to
14 perform adequate testing before exposing Plaintiffs to the medication, testing which would have
15 shown that CELEBREX had the potential to cause serious side effects including strokes like that
16 which affected Plaintiffs.

17 92. The CELEBREX manufactured and supplied by Defendants was defective due to
18 inadequate post-marketing warnings or instructions because, after Defendants knew or should
19 have known of the risk of injuries from CELEBREX, they failed to provide adequate warnings to
20 the medical community and the consumers, to whom they were directly marketing and
21 advertising CELEBREX; and, further, it continued to affirmatively promote CELEBREX as safe
22 and effective.

23 93. CELEBREX was manufactured, distributed, tested, sold, marketed, advertised and
24 promoted defectively by Defendants, and as a direct and proximate cause of Defendants'
25 defective design of CELEBREX, Plaintiffs used CELEBREX rather than other safer and cheaper
26 NSAIDs. As a result, Plaintiffs suffered the personal injuries described above.

27 94. Information given by Defendants to the medical community and to the consumers
28 concerning the safety and efficacy of CELEBREX, especially the information contained in the
advertising and promotional materials, did not accurately reflect the potential side effects of

1 CELEBREX.

2 95. Had adequate warnings and instructions been provided, Plaintiffs would not have
3 taken CELEBREX as they did, and would not have been at risk of the harmful side effects
4 described herein.

5 96. Defendants acted with conscious and deliberate disregard of the foreseeable harm
6 caused by CELEBREX.

7 97. Plaintiffs could not, through the exercise of reasonable care, have discovered
8 CELEBREX's defects or perceived the dangers posed by the drug.

9 98. As a direct and proximate consequence of Defendants' acts, omissions, and
10 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses.
11 Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred
12 and will continue to incur medical and related expenses. Plaintiffs also have suffered and will
13 continue to suffer mental anguish, physical pain and suffering, diminished capacity for the
14 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
15 preexisting conditions and activation of latent conditions, and other losses and damages.
16 Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician
17 care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.

18 99. Defendants' conduct was committed with knowing, conscious, wanton, willful,
19 and deliberate disregard for the value of human life and the rights and safety of consumers,
20 including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to
21 punish Defendants and deter them from similar conduct in the future.

22 100. WHEREFORE, Plaintiffs demand judgment against Defendants and seek
23 compensatory damages, and punitive and exemplary damages together with interest, the costs of
24 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

25 **THIRD CLAIM FOR RELIEF**

26 **Breach of Express Warranty**

27 101. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if
28 fully set forth herein and further allege as follows.

102. Defendants expressly represented to Plaintiffs and other consumers and the

1 medical community that CELEBREX was safe and fit for its intended purposes, that it was of
2 merchantable quality, that it did not produce any dangerous side effects, particularly any
3 unwarned-of side effects, and that it was adequately tested.

4 103. These warranties came in the form of:

5 a. Defendants' public written and verbal assurances of the safety and efficacy of
6 CELEBREX;

7 b. Press releases, interviews and dissemination via the media of promotional
8 information, the sole purpose of which was to create an increased demand for CELEBREX,
9 which failed to warn of the risk of injuries inherent to the ingestion of CELEBREX, especially to
10 the long-term ingestion of CELEBREX;

11 c. Verbal and written assurances made by Defendants regarding CELEBREX and
12 downplaying the risk of injuries associated with the drug;

13 d. False and misleading written information, supplied by Defendants, and published
14 in the Physician's Desk Reference on an annual basis, upon which physicians relied in prescribing
15 CELEBREX during the period of Plaintiffs' ingestion of CELEBREX, and;

16 c. advertisements.

17 104. The documents referred to above were created by and at the direction of
18 Defendants.

19 105. Defendants knew or had reason to know that CELEBREX did not conform to these
20 express representations in that CELEBREX is neither as safe nor as effective as represented, and
21 that CELEBREX produces serious adverse side effects.

22 106. CELEBREX did not and does not conform to Defendants' express representations
23 because it is not safe, has numerous and serious side effects, including unwarned-of side effects,
24 and causes severe and permanent injuries.

25 107. Plaintiffs, other consumers, and the medical community relied upon Defendants'
26 express warranties.

27 108. As a direct and proximate consequence of Defendants' acts, omissions, and
28 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses.

1 Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred
2 and will continue to incur medical and related expenses. Plaintiffs also have suffered and will
3 continue to suffer mental anguish, physical pain and suffering, diminished capacity for the
4 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
5 preexisting conditions and activation of latent conditions, and other losses and damages.
6 Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician
7 care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.

8 109. Defendants' conduct was committed with knowing, conscious, wanton, willful,
9 and deliberate disregard for the value of human life and the rights and safety of consumers,
10 including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to
11 punish Defendants and deter them from similar conduct in the future.

12 110. WHEREFORE, Plaintiffs demand judgment against Defendants and seek
13 compensatory damages, and punitive and exemplary damages together with interest, the costs of
14 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

15 **FOURTH CLAIM FOR RELIEF**

16 **Breach of Implied Warranty**

17 111. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if
18 fully set forth herein and further allege as follows.

19 112. Defendants manufactured, distributed, advertised, promoted, and sold
20 CELEBREX.

21 113. At all relevant times, Defendants knew of the use for which CELEBREX was
22 intended and impliedly warranted the product to be of merchantable quality and safe and fit for
23 such use.

24 114. Defendants were aware that consumers, including Plaintiffs, would use
25 CELEBREX for treatment of pain and inflammation and for other purposes.

26 115. Plaintiffs and the medical community reasonably relied upon Defendants'
27 judgment and expertise to only sell them or allow them to prescribe CELEBREX only if it was
28 indeed of merchantable quality and safe and fit for its intended use. Consumers, including
Plaintiffs, and the medical community, reasonably relied upon Defendants' implied warranty for

1 CELEBREX.

2 116. CELEBREX reached consumers, including Plaintiffs, without substantial change
3 in the condition in which it was manufactured and sold by Defendants.

4 117. Defendants breached their implied warranty to consumers, including Plaintiffs;
5 CELEBREX was not of merchantable quality or safe and fit for its intended use.

6 118. As a direct and proximate consequence of Defendants' acts, omissions, and
7 misrepresentations described herein, Plaintiffs sustained serious injuries and related losses.
8 Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred
9 and will continue to incur medical and related expenses. Plaintiffs also have suffered and will
10 continue to suffer mental anguish, physical pain and suffering, diminished capacity for the
11 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of
12 preexisting conditions and activation of latent conditions, and other losses and damages.
13 Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician
14 care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.

15 119. Defendants' conduct was committed with knowing, conscious, wanton, willful,
16 and deliberate disregard for the value of human life and the rights and safety of consumers,
17 including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to
18 punish Defendants and deter them from similar conduct in the future.

19 120. WHEREFORE, Plaintiffs demand judgment against Defendants and seek
20 compensatory damages and punitive and exemplary damages together with interest, the costs of
21 suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

22 **FIFTH CLAIM FOR RELIEF**

23 **Fraudulent Misrepresentation & Concealment**

24 121. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if
25 fully set forth herein and further allege as follows.

26 122. Defendants' superior knowledge and expertise, their relationship of trust and
27 confidence with doctors and the public, their specific knowledge regarding the risks and dangers
28 of CELEBREX, and their intentional dissemination of promotional and marketing information
about CELEBREX for the purpose of maximizing its sales, each gave rise to the affirmative duty

1 to meaningfully disclose and provide all material information about CELEBREX's risks and
2 harms to doctors and consumers.

3 123. Defendants made fraudulent affirmative misrepresentations with respect to
4 CELEBREX in the following particulars:

5 a. Defendants represented through their labeling, advertising, marketing materials,
6 detail persons, seminar presentations, publications, notice letters, and regulatory submissions that
7 CELEBREX had been tested and found to be safe and effective for the treatment of pain and
8 inflammation; and

9 b. Defendants represented that CELEBREX was safer than other alternative
10 medications.

11 124. Defendants made affirmative misrepresentations; and fraudulently, intentionally
12 and/or recklessly concealed material adverse information regarding the safety and effectiveness of
13 CELEBREX.

14 125. Defendants made these misrepresentations and actively concealed adverse
15 information at a time when Defendants knew or had reason to know that CELEBREX had defects
16 and was unreasonably dangerous and was not what Defendants had represented to the medical
17 community, the FDA and the consuming public, including Plaintiffs.

18 126. Defendants omitted, suppressed and/or concealed material facts concerning the
19 dangers and risk of injuries associated with the use of CELEBREX including, but not limited to,
20 the cardiovascular, cerebrovascular, and other serious health risks. Furthermore, Defendants'
21 purpose was willfully blind to, ignored, downplayed, avoided, and/or otherwise understated the
22 serious nature of the risks associated with the use of CELEBREX in order to increase its sales.

23 127. The representations and concealment were undertaken by Defendants with an
24 intent that doctors and patients, including Plaintiffs, rely upon them.

25 128. Defendants' representations and concealments were undertaken with the intent of
26 defrauding and deceiving Plaintiffs, other consumers, and the medical community to induce and
27 encourage the sale of CELEBREX.

28 129. Defendants' fraudulent representations evinced their callous, reckless, willful, and
depraved indifference to the health, safety, and welfare of consumers, including Plaintiffs.

130. Plaintiffs' physician and Plaintiffs relied on and were induced by Defendants' misrepresentations, omissions, and/or active concealment of the dangers of CELEBREX in selecting CELEBREX treatment.

131. Plaintiffs and the treating medical community did not know that the representations were false and were justified in relying upon Defendants' representations.

132. Had Plaintiffs been aware of the increased risk of side effects associated with CELEBREX and the relative efficacy of CELEBREX compared with other readily available medications, Plaintiffs would not have taken CELEBREX as he did.

133. As a direct and proximate consequence of Defendants' acts, omissions, and misrepresentations described herein, Plaintiffs sustained serious injuries and related losses. Plaintiffs required and will continue to require healthcare and services. Plaintiffs have incurred and will continue to incur medical and related expenses. Plaintiffs also have suffered and will continue to suffer mental anguish, physical pain and suffering, diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and activation of latent conditions, and other losses and damages. Plaintiffs also incurred direct medical losses and costs include care for hospitalization, physician care, monitoring, treatment, medications, and supplies. Plaintiffs have also suffered loss of wages.

134. Defendants' conduct was committed with knowing, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiffs, thereby entitling Plaintiffs to punitive and exemplary damages so as to punish Defendants and deter them from similar conduct in the future.

135. WHEREFORE, Plaintiffs demand judgment against Defendants and seek compensatory damages, and punitive and exemplary damages together with interest, the costs of suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

SIXTH CLAIM FOR RELIEF

Unjust Enrichment

136. Plaintiffs incorporate by reference all previous paragraphs of this Complaint as if fully set forth herein and further allege as follows.

137. At all times relevant to this action, Defendants were the manufacturers, sellers,

and/or suppliers of CELEBREX.

138. Plaintiffs paid for CELEBREX for the purpose of managing their pain safely and effectively.

139. Defendants have accepted payment from Plaintiffs for the purchase of CELEBREX.

140. Plaintiffs did not receive the safe and effective pharmaceutical product for which she paid.

141. It is inequitable and unjust for Defendants to retain this money because Plaintiffs did not in fact receive the product Defendant represented CELEBREX to be.

142. WHEREFORE, Plaintiffs demand judgment against Defendants and seeks equitable relief, the costs of suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

PRAYER FOR RELIEF

WHEREFORE, Plaintiffs request the following relief:

1. General damages in excess of the jurisdictional amount of this Court;
2. Consequential damages;
3. Disgorgement of profits;
4. Restitution;
5. Damages for loss of consortium, care, comfort, society and companionship in an amount within the jurisdiction of this Court and according to proof;
6. Punitive and exemplary damages;
7. Pre-judgment and post-judgment interest as provided by law;
8. Recovery of Plaintiffs' costs including, but not limited to, discretionary Court costs of these causes, and those costs available under the law, as well as expert fees and attorneys' fees and expenses, and costs of this action; and
9. Such other and further relief as the Court deems just and proper.
